## INFO

TITLE: Consumer Behaviours on SkinCare

AUTHOR: Lok Mei Hui

DATE: 17/8/2024

SHEET: 02

TASK: Visualise Consumer Bhv on skincare

## OPERATIONS

- ① Hover over world cloud to see total count of preferred ingredients.
- ② Hovering the line of combined bar & line chart will display details in a tooltip.
- ③ Selecting the line will show data based on the selected gender
- ④ Hovering over the center or segment of pie chart will show detailed of data accordingly.

## DISCUSSIONS

ve => allow user to get interactive attention by allowing them to select & show changes on the design.

=> hovering over the data allow user to read more details regarding the data.

-ve => Difficult to view the distribution of pie chart in matrix bubble chart

=> hard to implement

=> does not relate to dataset 2 (Sephora skincare)

=> matrix bubble + pie chart can be confusing to understand.

## INFO

TITLE: SkinCare Analysis Based on

AUTHOR: <sup>Spending</sup> Lok Mei Hui

DATE: 17/8/2024

SHEET: 04

TASK: Visualise suitable skincare product based on spending

## OPERATIONS

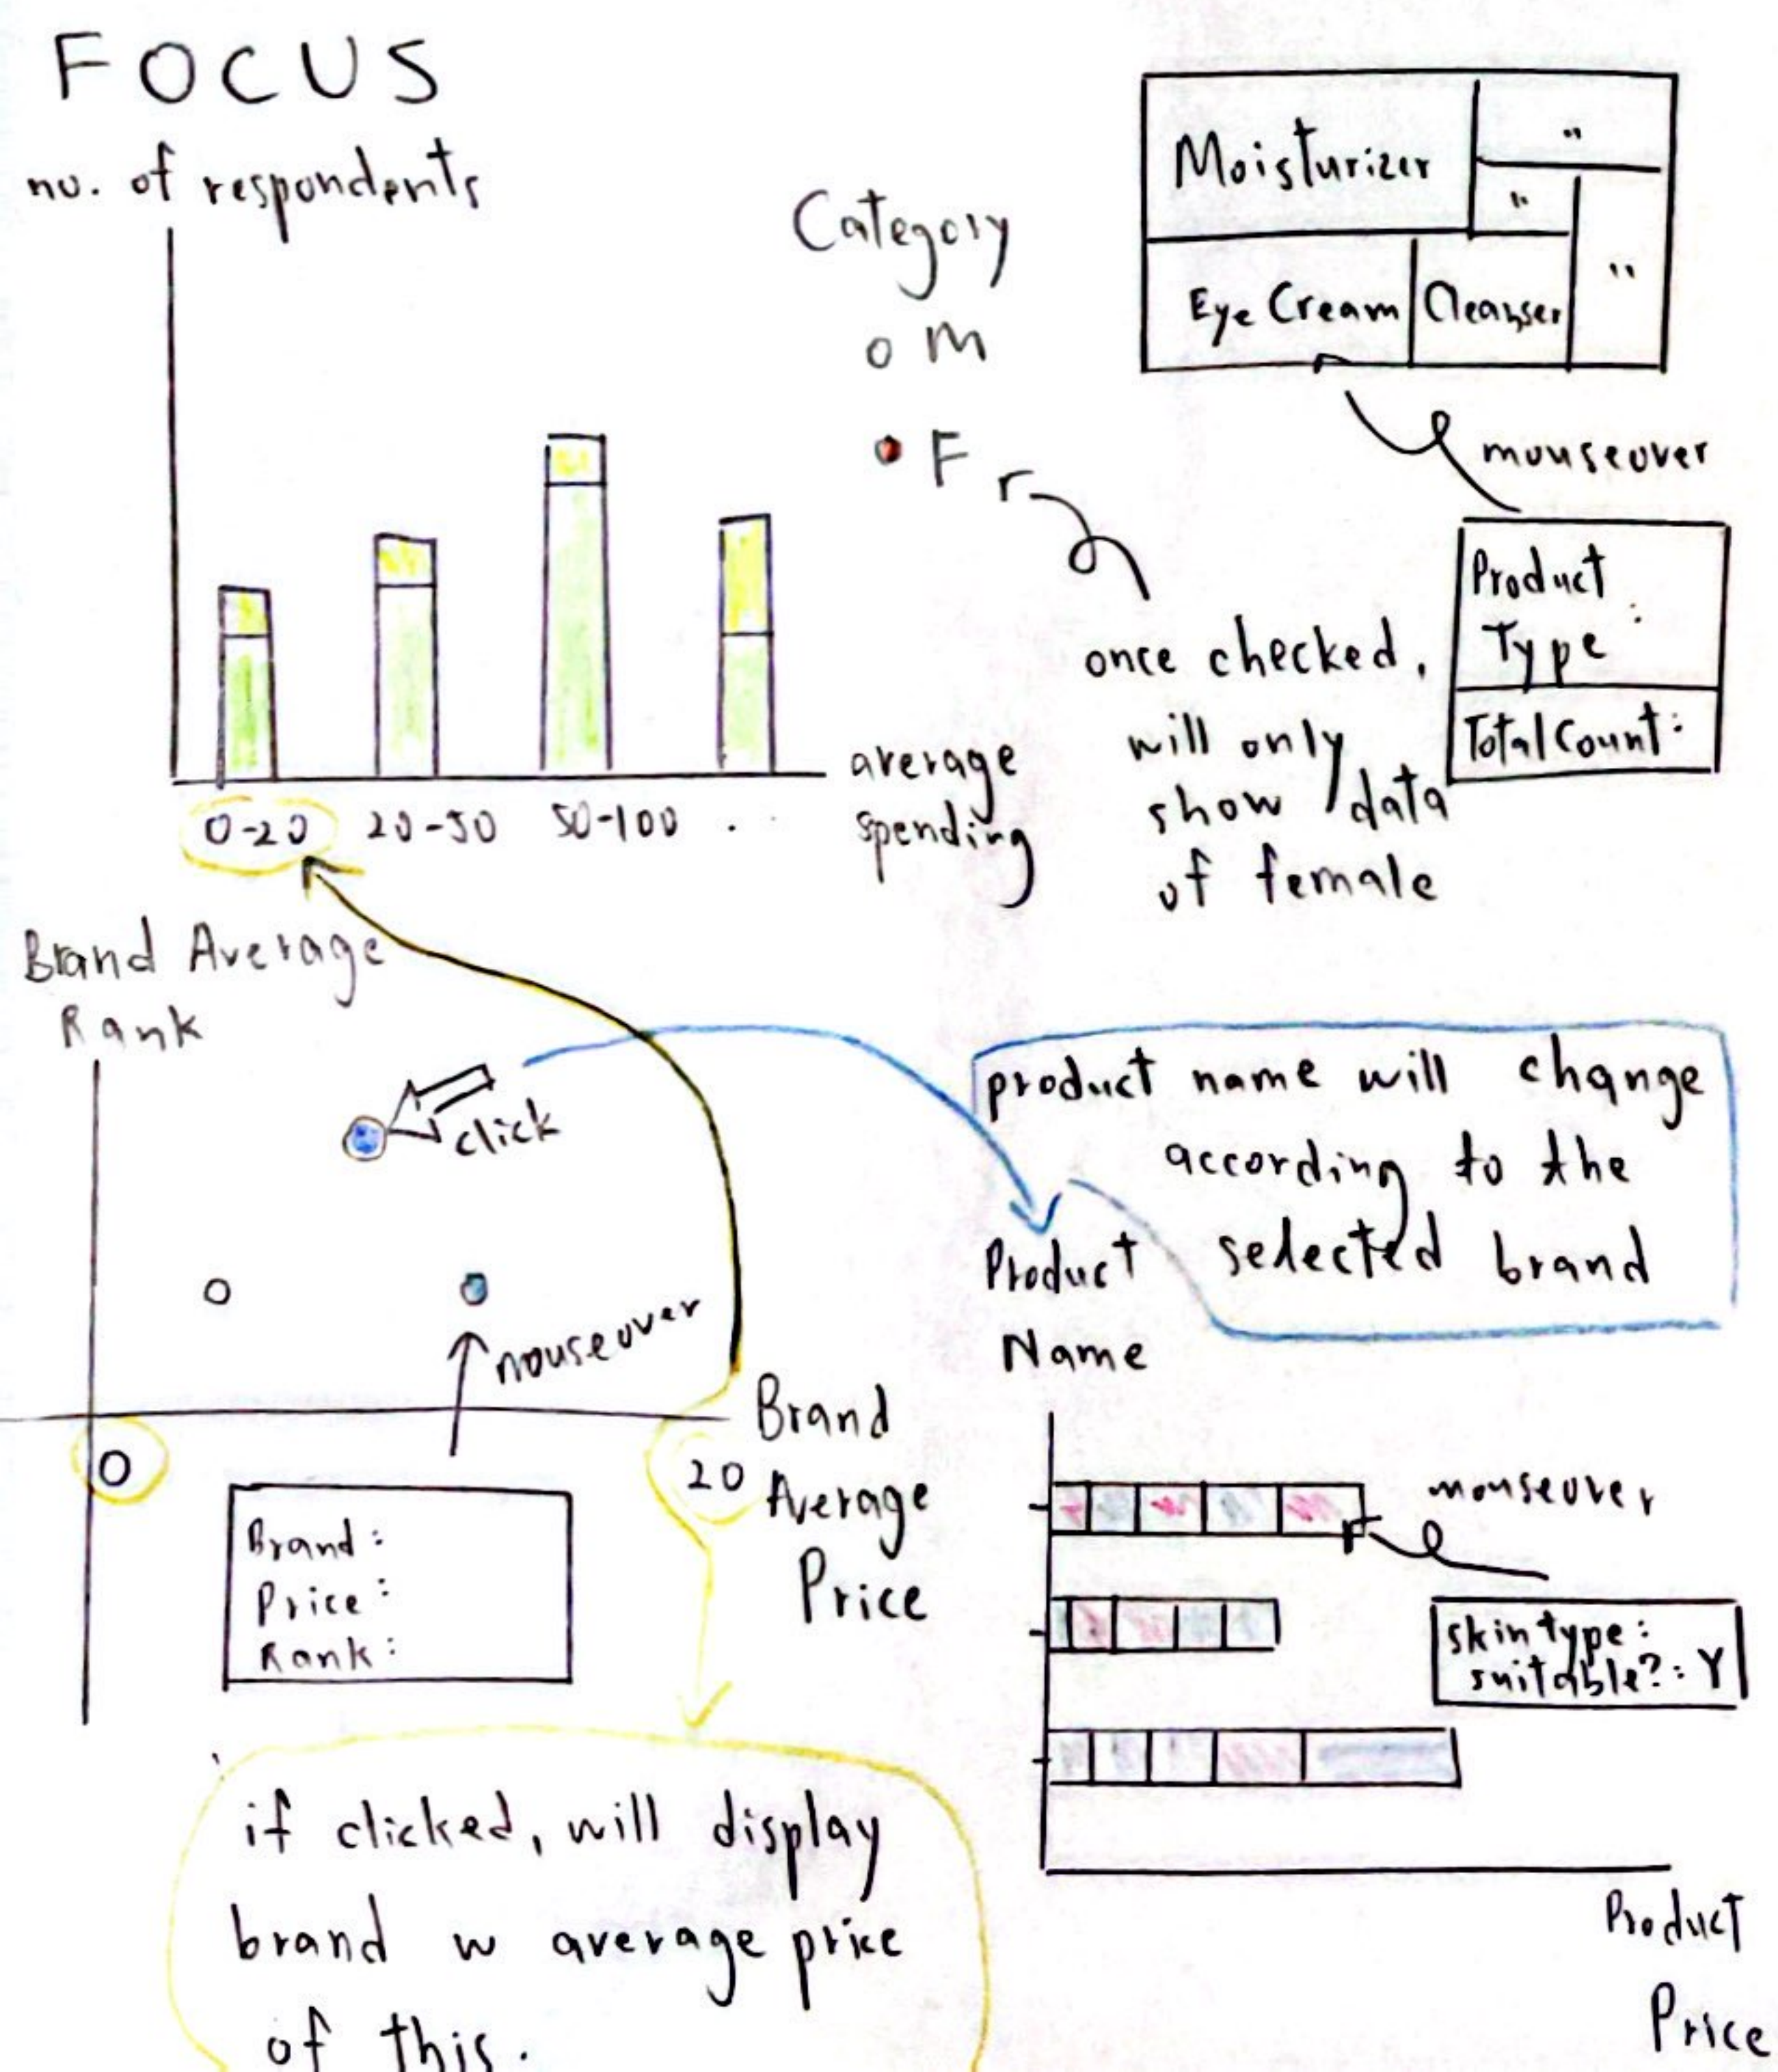

- ⇒ checking/unchecking the gender category will change the group stacked bar chart data accordingly.
- ⇒ hovering/selecting the dot will display detailed in a tooltip.
- ⇒ clicking the average spending (0-20/20-50...) will filter the brand in dot chart.
- ⇒ selecting the dot will show details of the products under this brand in stacked bar chart.

## DISCUSSIONS

- +ve ⇒ hovering over data allow user to hv details of the data (tooltip)
- ⇒ provided a checkbox whr user can filter the data based on gender
- ⇒ Allow user to determined brand that r within their average spending.

-ve ⇒ Not all products will be shown on the shorizontal stacked bar chart.

⇒ user may not know that clicking the category of average spending could filter the data.
